1. Upon further consideration, the rejections of claims 59-65 under 35 U.S.C. 130(a) over Hill (2,010,082) in view of Estkowski (4,696,394) and in further view of Havens et al. (5,033,253) are withdrawn. Because, these references do not teach that the heat shrinking material is directly contacting tips of the teeth of the saw blade as recited in claim 59 and argued in applicant's response filed on 08/13/04.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The claims are allowable because the prior art fails to teach that the heat shrinking material directly contacting tips of the teeth of the saw blade as set forth in claim 59.

Regarding claim 59, Hill teaches a saw blade including first and second sides, a peripheral edge, and a plurality of teeth that extend along the peripheral edge. Hill also teaches a cover that has first and second portions with opposite inner and outer surfaces. Hill also teaches that the first portion of the cover is facing the first side of the saw blade and the second portion of the cover is folded over the first portion with the inner surface of the second portion facing the second side of the saw blade. Hill also teaches that the teeth of the saw blade are secured between the first and second portions of the cover. However, Hill does not teach that the cover is made of heat shrinking material and is directly contacting tips of the teeth of the saw blade as set forth in claim 59.

Estkowski teaches a protective cover made of shrinking material for covering annular object. The cover has first and second portion with opposite inner and outer surfaces. The cover also is directly contacting the peripheral edge of the annular object. However

Estkowski also fails to teach to teach that the heat shrinking material directly contacting tips of the teeth of the saw blade as set forth in claim 59.

Havens et al. teaches a heat shrinking material covers a sharp point of an object. However, Havens et al. also does not teach that the heat shrinking material directly contacting tips of the teeth of the saw blade as set forth in claim 59.

None of these references by themselves or in combination with the other prior art cited teach the claimed invention set forth in claim 59.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
